Biological

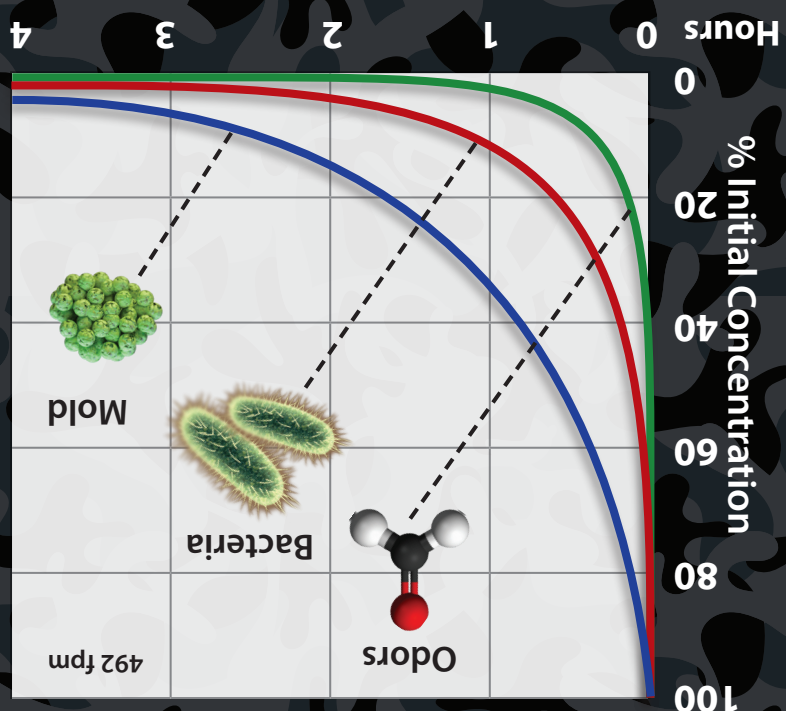

- Mold • Allergens • Viruses • Bacteria
- Fuel oil / Gasoline / Vehicle exhaust
- Cleaning & disinfecting chemicals
- Paints / varnishes / solvents
- Composite wood products
- Flooring / carpets / upholstery
- Building materials
- Cooking smells
- Pet odors
- Cigarette / cigar / pipe smoke

Odors and VOCs

Warrior is especially effective against Volatile Organic Compounds (VOCs) which are the source of nearly all bad smells and may be toxic. Warrior also sterilizes microbes as they pass by in the air stream. The result is cleaner, healthier, fresh smelling indoor air.

Proven Effective

Indoor air pollution is often five times worse than outdoor air pollution. The unique design of Warrior addresses both biological and chemical contaminants in indoor air.

Reduction of Common Indoor Air Contaminants Over 4 Hours

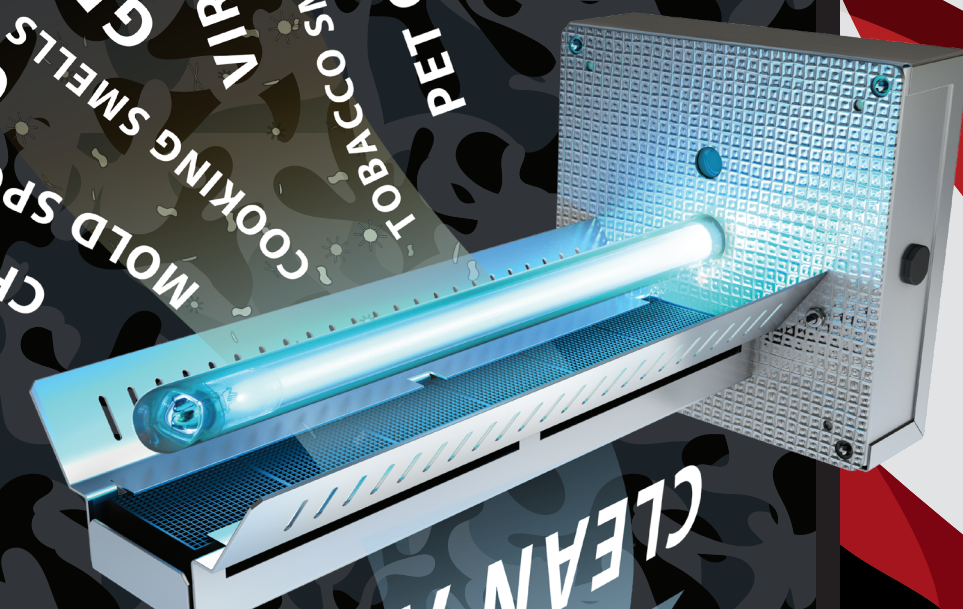

Warrior Dual includes second UV lamp to keep coils clean

COILS WITH MOLD

COILS WITH UV LIGHT

- PET ODORS
- TOBACCO SMOKE
- COOKING SMELLS
- VIRUSES
- GERMS
- ODORS
- CHEMICALS
- MOLD SPORES

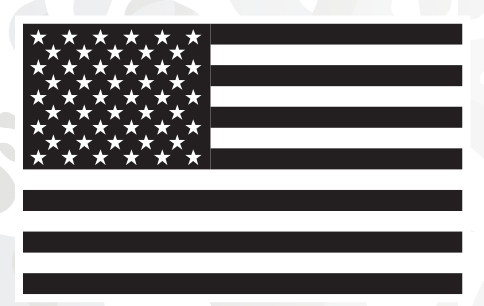

CLEAN AIR

The Other Two Thirds

Airborne contaminants can be divided roughly into thirds. Conventional filtration is effective against particulates, like dust, but has no effect on the other two thirds. Photocatalytic Oxidation (PCO) is proven to safely reduce both VOCs and biological contaminants inside the air system and throughout the home.
